

TWO DAY WOKSHOP ON REGENERATIVE ORGANIC FARMING

A Two Day Wokshop on Regenerative Organic Farming was organized by the Department of BioTechnology in association with Nandi Foundation fom 14 March 2022 to 15 March 2022. Total 40 students of Biotechnology participated in this workshop. In this lively, enlightening workshop the Resouce Person, explained how we can substitute the usage of chemical fertilizers and pesticides with usage of organic fertilizers and pesticides to rejuvenate the Earth for the sake of human health.

On the first day of the Workshop, students learned the Pros and Cons of Regenerative faming and they prepared charts and models on Organic Farming. On the Second Day, they learned the preparation of Organic Fertilizers like Panchagavya, Jeevamutham, Organic manure using cow dung, milk, ghee, dry and wet leaves etc.
