NATIONAL SCIENCE DAY CELEBRATION 28-02-2022

National Science Day commemorates the discovery of the Raman Effect by Dr.C.V.Raman, for which he won the Nobel Prize in Physics. The National Science Day is celebrated on 28th February every year across the country in honour of physicist C.V.Raman's discovery of the Raman Effect, which gave Asia's Nobel Prize in the Sciences in 1930. Sir.C.V.Raman and his student-collaborator K.S.Krishnan made this discovery of the phenomenon in 1928. It was the first Nobel in Physics for a non-white person and for an Indian scientist. The theme of National Science Day 2022 is 'Integrated Approach in Science and Technology for a Sustainable Future'. On the occasion of National Science Day, the Department of Physics conducted Science day celebrations in our college. Science day celebrations started with the inaugural session on 28th Feb 2022 with the lighting of the lamp and paying homage to Sir.C.V.Raman. Students and faculty of our college, Junior colleges and various schools attended the programme. Our college principal, Dr.S.Madhavi presided over the session and gave a brief introduction about the significance of celebrating National Science Day on 28th February and she motivated the students to choose scientific research as their career and to come up with new inventions. In this connection, Science exhibition was organized. The students from various science departments of our college exhibited working models. All the faculty, students, media and others visited and appreciated the exhibits. The Department of Chemistry, also conducted Science Exhibition and conducted experiments on Osmosis, Chromatography and Food Adulteration. They also conducted a National Level online Quiz on this occasion. National Science Day's primary objective is to ignite an interest in science, inspire people, especially students, to perform new experiments, and make them aware of the latest developments in science and technology.

NATIONAL SCIENCE DAY 2023

National Science Day is celebrated every year on February 28. The day marks the discovery of the Raman effect by renowned physicist CV Raman. The theme of National Science Day this year is 'Global Science for Global Wellbeing'. The theme indicates India's emerging global role and rising visibility in the international arena. We celebrated Science Day with great pomp and show this year. All the science departments of our college paid floral tributes to CVRaman. The Department of Physics conducted a national level online quiz on this occasion and received huge response from the students. The Department of Chemistry exhibited science models out of which rain water harvesting and drip irrigation models were outstanding. The department of chemistry conducted an online National E-Quiz on chemistry on the occasion of National science day on 28-02-2023 about 237 responses were received from various colleges both the telugu states of AP & Telangana. All the science departments conducted online "Motivational Talk on the Role of Science and Technology in Today's life" by inviting J. Girish Gupta, Research Engineer & technical manager at IRSDL. He spoke in depth about artificial intelligence, machine learning data science which forms the basis of all computer learning & its applications in everyday life such as financial services, fraud detection, retail purchase predictions and virtual customer assistance. He urged the students to pursue higher studies and motivated them to do research.

NATIONAL SCIENCE DAY CELEBRATION - 2023

National science day event was conducted by Department of Biotechnology on 28/02/2023 to kindle the scientific temperament among the students.
