WORLD CYCLE DAY RALLY:

World Bicycle Day is essential to the health of individuals and the environment. It's a sustainable means of transportation that's simple to use, affordable, and is reliable for those who may not have access to a car. It provides access to education, health care, and physical activity for those who don't have any other means of transportation. Cycling is pitched as a healthy, green and economical transport alternative. A new UN General Assembly resolution adopted in 2022 on "Integration of mainstream bicycling into public transportation systems for sustainable development" reinforces these principles.
